Available in 600 + Colours

## Applications

Car Parks      Factories      Schools

H POST

Z POST

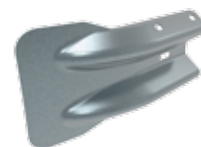

Yellow End Cap

Our Crash Barrier Beams are for off road use only and have an effective length of 3200mm. Each end has 8 bolt holes for 'Lap Bolts' which are used to join to the next beam, corner or end piece. Each post attaches to the beam with 1 'Post Bolt' and there are three oval holes in the beam to allow up to 3 posts per beam.

- We sell all nuts and bolts to fit the crash barrier together.
- Custom posts made to order

BEAM TYPE	Finish	Dimensions	Steel Thickness	Weight
Standard	Galvanised	3420 X 310	2.5	28 kg
Economy	Pre Galv	3420 X 310	1.5	19.5 kg
